INVEST IN A TIMELESS ICON

Britannia has featured on British coins for hundreds of years, evolving through the ages to reflect the nation she represents. In 1987, a stunning incarnation of Britannia was created by the sculptor Philip Nathan for a new bullion coin.

His beautifully bold Britannia is presented with carefully chosen symbols to reflect the nation's values – a shield for protection, an olive branch for peace and a trident for her maritime links. The internationally recognised design is highly regarded and only The Royal Mint is able to strike Britannia coins featuring Philip Nathan's interpretation of the icon.

ENGINEERED TO BE SECURE

The 2023 Britannia bullion coin redefines security in the market, leading the way as the most visually secure bullion coin in the world. Philip Nathan's iconic Britannia has been enhanced with four new design features that make it easy to authenticate and liquidate your bullion coins. Our Britannia is so difficult to counterfeit, it is recognised and trusted worldwide.

FOUR SECURITY FEATURES, ONE SECURE COIN

IMAGE

A latent image switches between a trident and a padlock when the coin is rotated.

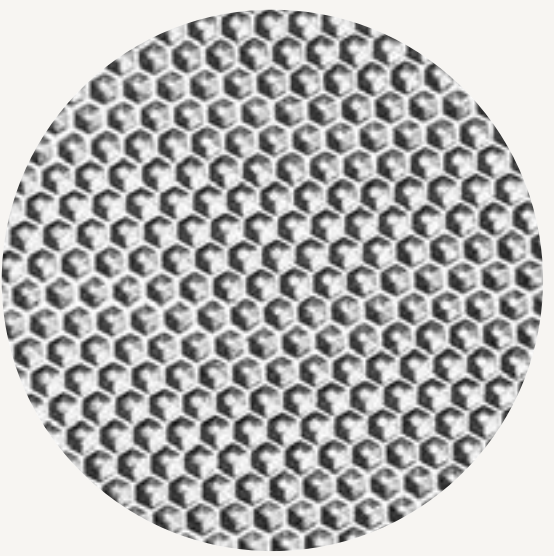

LETTERING

Micro-text spells out the words 'DECUS ET TUTAMEN', meaning 'An ornament and a safeguard'.

SHIELD

The light and dark tones of the United Kingdom flag on Britannia's shield are created by smooth lines.

BACKGROUND

Surface animation creates a wave motion behind Britannia when the coin is moved.

For the first time, the Britannia bullion coin will feature the coinage portrait of His Majesty The King. Britannia first appeared on British coins in 1672, during the reign of Charles II.
