Britannia

2023 BULLION COIN RANGE

Britannia has long featured on British coins and has evolved through the ages to reflect the nation she represents. In 1987, a stunning incarnation of Britannia was created by the sculptor Philip Nathan for a new bullion coin. His beautifully bold Britannia is presented with carefully chosen symbols to reflect the nation's values – a shield for protection, an olive branch for peace and a trident for her maritime links. The internationally recognised design is highly regarded and only The Royal Mint is able to strike Britannia coins featuring Philip Nathan's interpretation of the icon.

The Britannia bullion coin redefines security in the bullion market, leading the way as the most visually secure bullion coin in the world. Philip Nathan's award-winning Britannia design of 1987 has been enhanced with four innovative security features that enable you to effortlessly authenticate each coin.

The 2023 Britannia bullion coin range also marks an iconic moment in modern British history, with each coin in this range featuring the first portrait of His Majesty The King on the obverse.

KEY FEATURES

- Four visual security features offer effortless authentication and liquidation
- Available in fine gold, silver and platinum editions
- Featuring the first coinage portrait of King Charles III on the obverse
