Britannia

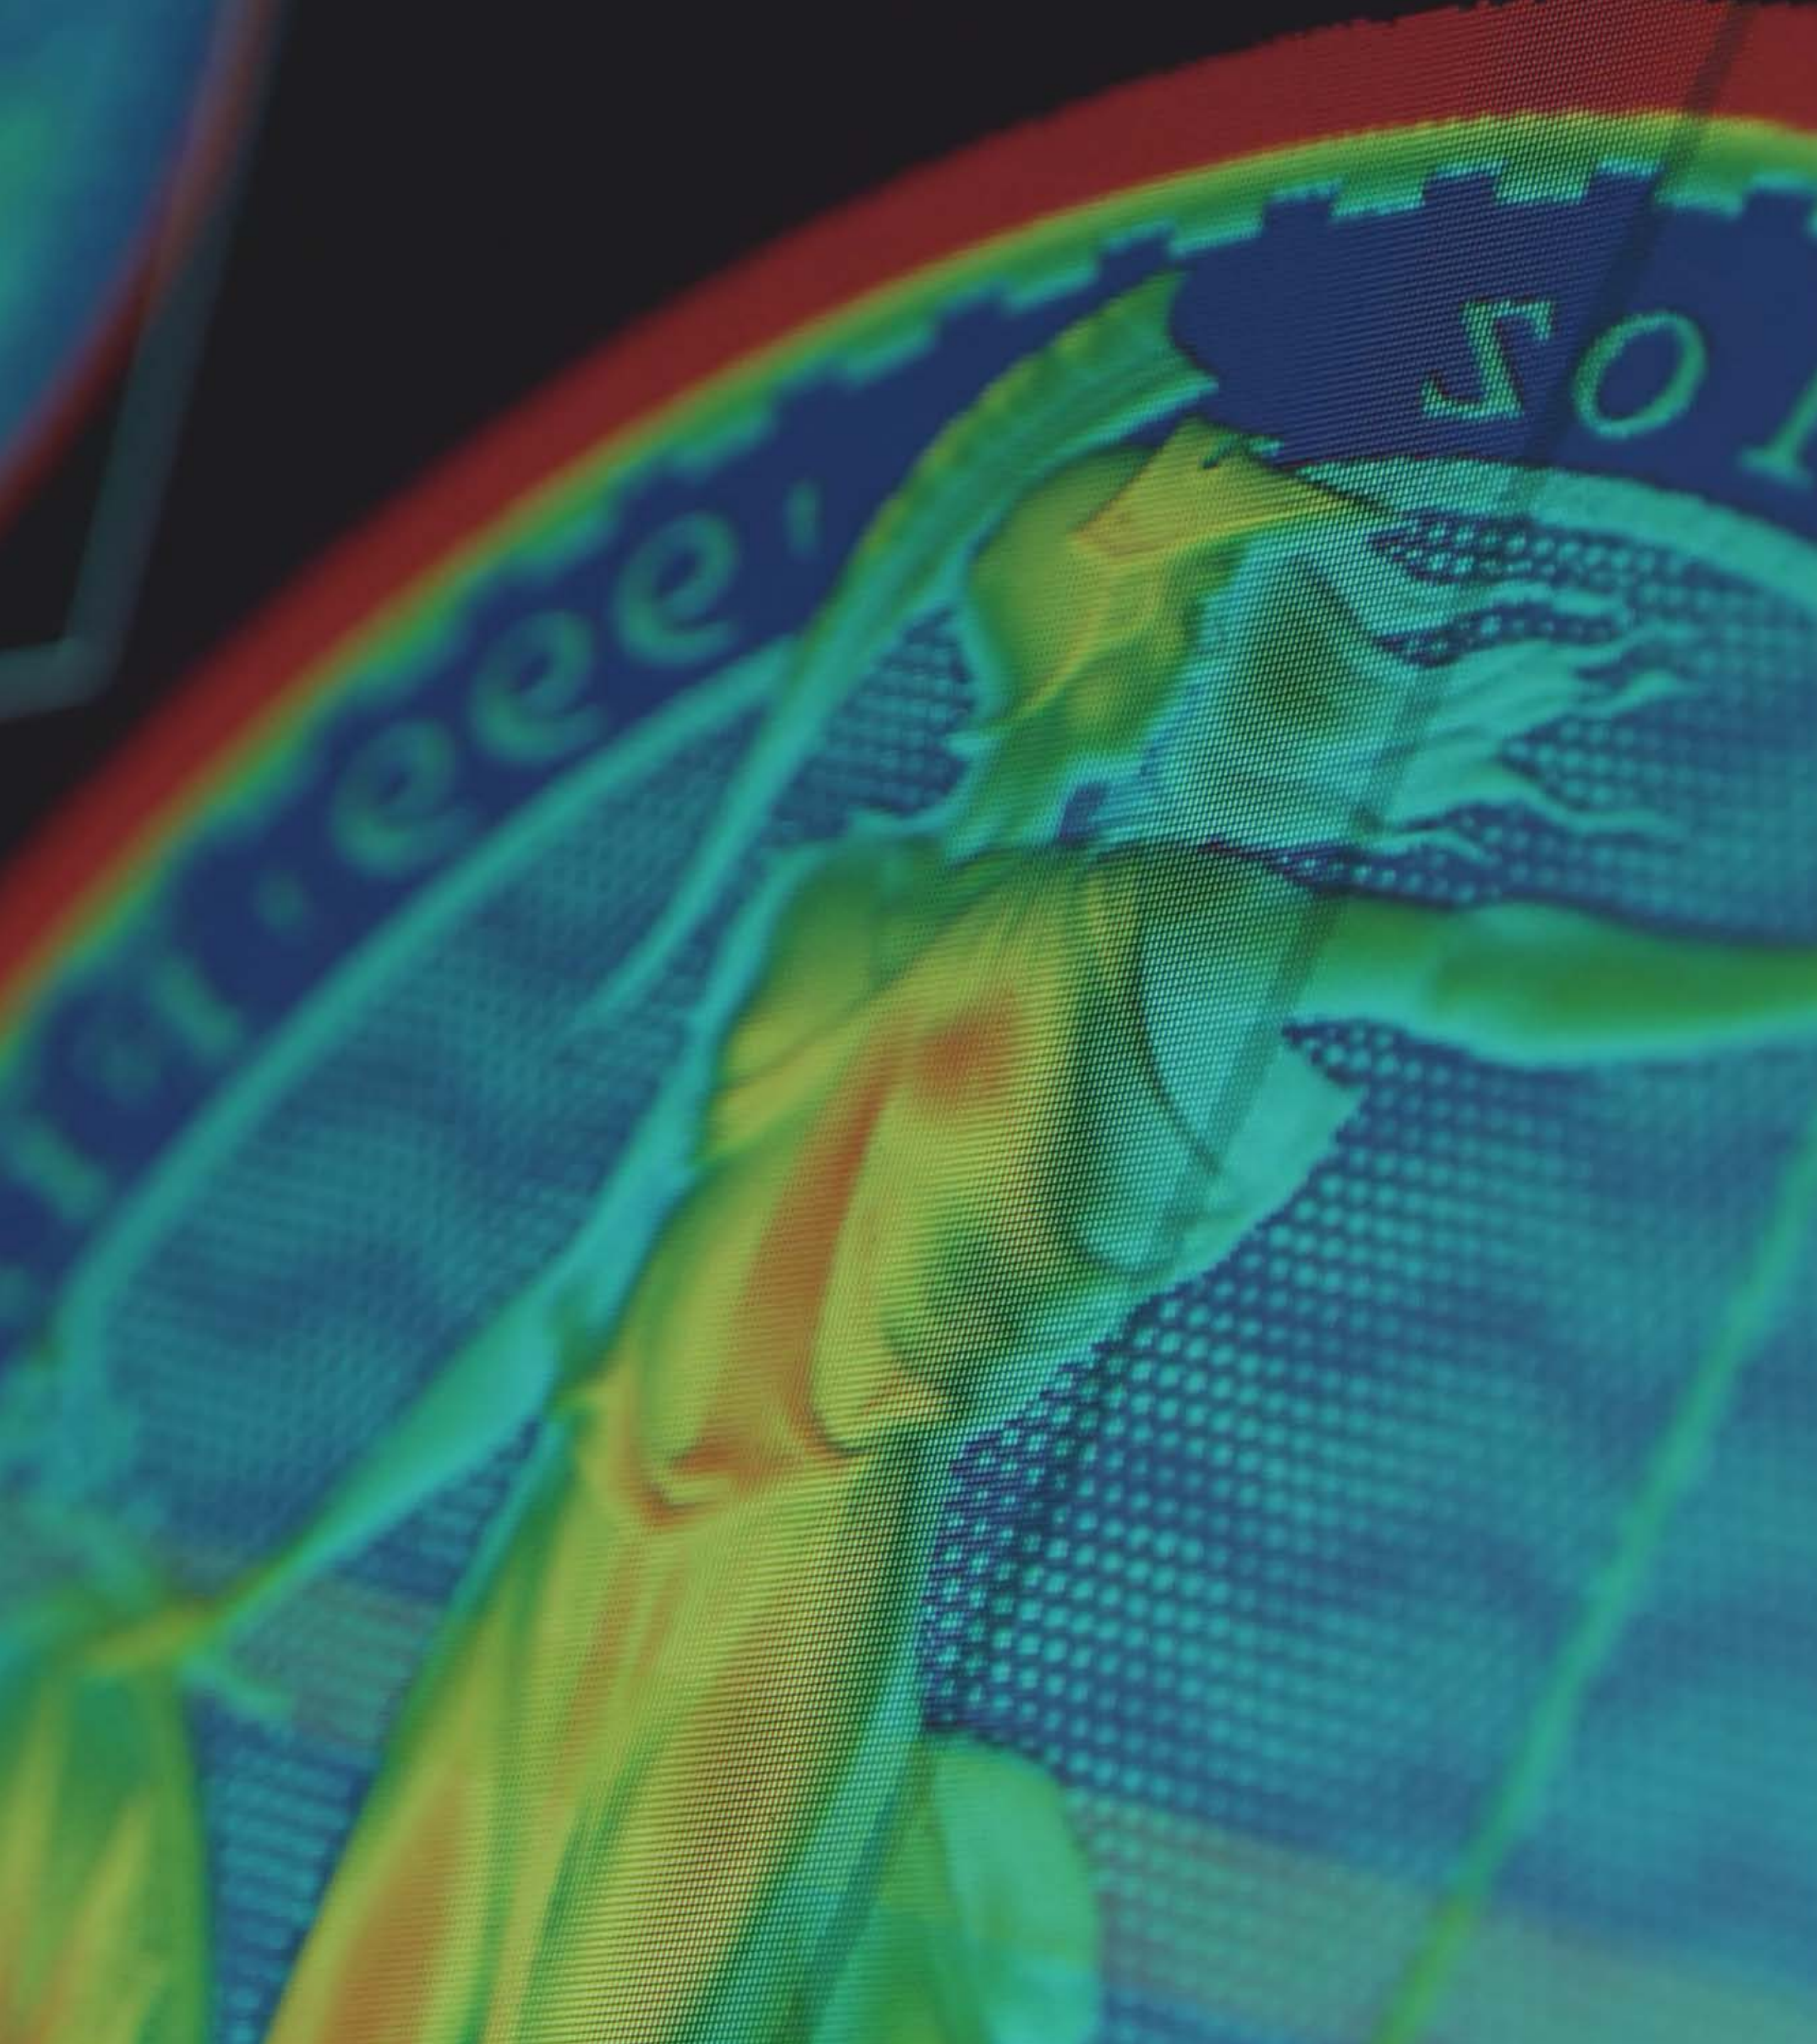

2023 BULLION COIN RANGE

The World's Most Visually Secure Bullion Coin

CLICK TO WATCH

REDEFINING BULLION SECURITY

The Britannia coin redefines security in the bullion market, using the latest technology to become the most visually secure bullion coin in the world. Philip Nathan's award-winning 1987 Britannia design remains the enduring symbol of a nation, and has been enhanced with four innovative security features, which have been carefully applied to this timeless design to provide investors with the perfect balance between beauty and security.

KEY FEATURES

MICRO-TEXT

Micro-text next to the coin’s banding reads ‘DECUS ET TUTAMEN’, which translates as ‘An Ornament and a Safeguard’.

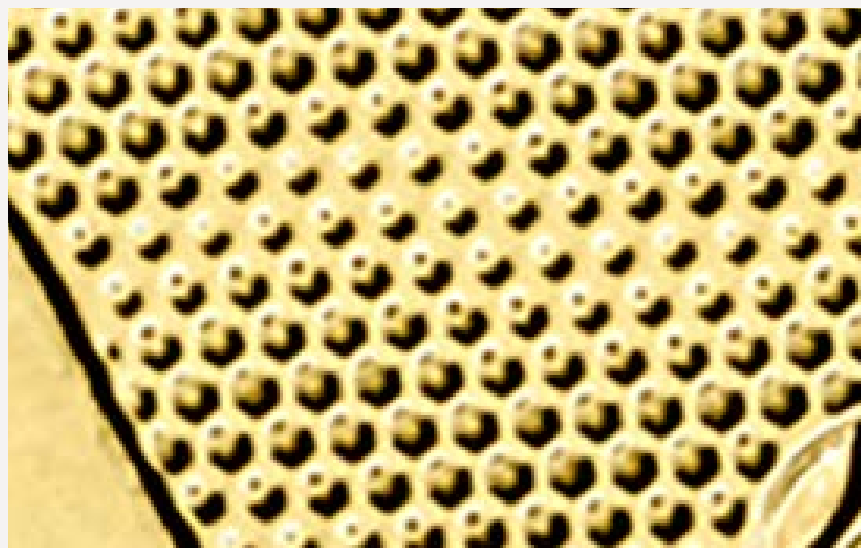

LATENT IMAGE

A latent image switches between a trident and a padlock as the viewer changes their perspective, representing both Britannia and bullion security.

TINCTURE IMAGE

Britannia’s shield bearing the Union flag, a powerful symbol of Britain as a whole, is highlighted with tincture lines.

SURFACE ANIMATION

The background has surface animation reflecting the movement of the sea, which adds to the intricacy of the design and safety of the coin.

“We want people to feel confident that the coin they have is genuine, but we also wanted to make it a beautiful object. I believe we’ve managed to achieve both those things with this coin.”

Gordon Summers,
Chief Engraver at The Royal Mint
